Guidance for Completing the Privacy Impact Assessment

A Privacy Impact Assessment (PIA) is an analysis of how Personally Identifiable Information (PII) is collected, stored, maintained, and shared. A PIA must be completed when FHFA: 1) develops or procures an IT System or project that collects, maintains, or disseminates PII from or about members of the public; or 2) initiates a new electronic collection of PII for 10 or more members of the public. System Owners are primarily responsible for completing the PIA with assistance from IT developers, IT security officers, and the Privacy Office.

OVERVIEW SECTION

- Provide a thorough, complete, and clear overview of the System and give the reader the appropriate context to understand the responses. Some questions to consider include:
 - What is the purpose of the System?
 - What will be the primary uses of the System?
 - How will this support the Division's/Office's/Program's mission?
- This section fulfills the E-Government Act's requirement for an introduction to members of the public who may be reading the PIA. PIAs may be made publicly available unless a determination is made to not make the PIA available because publication would raise security concerns and/or reveal classified or sensitive information.

SECTION 1.0 CHARACTERIZATION OF THE INFORMATION

- Identify if the System contains information about individuals, versus statistical, geographical, or financial information, with no link to a name or other identifier, such as, home address, social security number, account number, home, mobile or facsimile telephone number, or personal e-mail address.
- Examples of sources of the information include information that comes from an individual applying for a loan or mortgage, or other forms that an individual completes. A question to consider:
 - Where does the data originate? (e.g., FHFA, Office of Personnel Management, Regulated Entities, other Financial Institutions, or third parties). A third party is usually a non-Federal person or entity, which may be a source of data/information (e.g., a bank, an internet service provider, or a private organization).
- If the System collects information from 10 or more members of the public, ensure that FHFA has received prior approval from OMB to do so or determine whether OMB's approval is needed to collect the information in accordance with the Paperwork Reduction Act. If you are unsure of this last requirement, contact the Office of General Counsel for assistance.

SECTION 2.0 USES OF THE INFORMATION

- Identify the primary uses of the information and how the information supports FHFA's or the Office's/Division's/Program's mission.
- Identify the controls that are in place to ensure the information will be used for the manner for which it was collected. For example, access to the information will be restricted to a limited number of staff who use the data for their specific program use.

SECTION 3.0 RETENTION

- The Privacy Act requires an agency to address the retention and disposal of information about individuals. This retention information is published in the Privacy Act System of Record Notice (SORN).

- The retention periods for data/records that FHFA manages are contained in either the National Archives and Records Administration (NARA) General Records Schedule (GRS) or FHFA's Records Schedule. For the data being created/ maintained in the System, these records schedules are the authoritative sources for this information. For assistance, contact FHFA's Records Management Office.
- Disposing of the data at the end of the retention period is the last state of life-cycle management. Records subject to the Privacy Act have special disposal procedures (e.g. shredding of paper documents).

SECTION 4.0 NOTICE, ACCESS, REDRESS AND CORRECTION

- The Privacy Act requires that "each agency that maintains a System of records shall maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President." 5 U.S.C. 552a(e)(1).
- Data can be retrieved in a number of ways, but there is usually a personal identifier associated with a record. If the System retrieves information by an individual's name or other unique identifier (e.g. social security number) it is a Privacy Act System and will need a SORN published in the Federal Register. The System may already have a Privacy Act SORN. If you do not have a published SORN, or are unsure whether one exists, contact FHFA's Privacy Office.
- If a name or other unique identifier is not used to retrieve information, it is possible that the System is not a Privacy Act System. However, even though information may not fall under the Privacy Act's protection and requirements, certain information may still be protected from disclosure under the Freedom of Information Act.
- The agency has developed and published an agency specific Privacy Act Rule in the Federal Register (12 CFR Part 1204) that explains how individuals can gain access to information about themselves and correct errors, if appropriate.
- Any employee who knowingly and willfully maintains a System of Records without meeting the Privacy Act notice requirements (5 U.S.C. 552a(e)(4)) is guilty of a misdemeanor and may be fined up to \$5,000.

SECTION 5.0 SHARING AND DISCLOSURE

- If you do not know whether or not Systems share data, contact either the business owner of the data, or the IT specialist who knows what interfaces exist between the Systems/applications. As an example, if your System/application shares data with another System/application, ask yourself whether you have access to the data in the interfaced System/application. If so, then your answer is yes and an explanation is needed.
- Also consider "other" users who may not be obvious as those listed, such as GAO, or FHFA's Office of Inspector General. "Other" may also include database administrators or IT Security Officers. Also include organizations listed in the Privacy Act SORN under the "Routine Use" section when a Privacy Act SORN is required. The more comprehensive the list, the better it is.
- You must first review the SORN to determine whether any information that may come from an existing SORN allows that information to be exchanged and used for these new purposes or uses. There are restrictions on the use and disclosure of information that are set forth in a SORN.

SECTION 6.0 ACCESS AND SECURITY

- Access to data by a user (i.e. employee or contractor personnel) within FHFA is determined on a "need-to-know" basis. This means that authorized employees or contractor personnel who have a need for the information to perform their duties may be granted access to the information. Factors

to consider in making this determination include the user's job requirements including supervisory responsibilities.

- The criteria, procedures, controls and responsibilities regarding access must be documented in order to comply with the intent of the Federal Information Security Management Act of 2002 for standards and guidelines on security and privacy.
- The System owner is responsible for ensuring that access to information and data is restricted to authorized personnel. Usually, a user is only given access to certain information that is needed to perform an official function. Care should be given to avoid "open Systems" where all information can be viewed by all users. System administrators may be afforded greater access – i.e. to all of the data – depending upon the System and/or application. However, restrict access when users do not need to have access to all the data.
- When a contract provides for the operation of a System on behalf of FHFA, the Privacy Act requirements must be applied to such a System. Contact the Contracting Officer or Contracting Officer's Representative to determine whether the contract contains the Privacy Act clause and the requirements thereunder.
- The Security Assessment and Authorization (SA&A) process requires a System security plan that identifies the technical controls associated with identification and authentication of users. Certain laws and regulations require monitoring of Systems to ensure that only authorized users can access the System for authorized reasons. In doing so, consider what controls are in place to ensure that only those authorized to monitor the System can in fact monitor use of the System. For example, business rules, internal instructions, and posting Privacy Warning Notices address access controls and violations for unauthorized monitoring. System Owners are responsible for ensuring that no unauthorized monitoring is occurring.
- The IT Security Plan describes the practice of applying logical access controls. Logical access controls are System-based means by which the ability to access a System is either explicitly enabled or restricted. System Owners are responsible for ensuring that no unauthorized access is occurring.
- The IT Security Plan describes the practice of audit trails. An audit trail maintains a record of System activity and user activity including invalid logon attempts, access to data and monitoring. The SA&A process requires a System security plan outlining the implementation of the technical controls associated with identification and authentication.
- Every System/application/process that uses data must have controls in place to prevent the misuse of the data by those having access to the data. For instance, in computerized Systems, the Security Information Record (SIR) is part of the Core Storage Terminal Table. The SIR is the automated tool that identifies and authenticates an individual for the System and is transparent to the user.
- All employees, including contractors, have requirements for protecting information in Privacy Act Systems. Describe the controls in place, including any privacy and security awareness controls such as training materials, to protect the information.

PIA FORM

Overview

Provide an overview of the System and address the following:

- The System name and the division/office that owns the System;
- The purpose of the program, System, or technology and how it relates to the agency's mission;
and
- A general description of the information in the System.

System Owner(s)			
Name	E-mail	Division/Office	Office Phone Number
Nichole Strong	Nichole.strong@fhfa.gov	Office of Human Resources Management (OHRM)	(202) 649-3748
System Overview: Briefly describe the purpose of the program, System, or technology, and the information in the System, and how it relates to the agency's mission.			
<p>FHR Navigator is an enterprise Human Resources (HR) system that automates Federal human resources functions. It is a suite of web-based software tools that is undergirded by a centralized database to support the strategic management of human capital within the Federal workplace. The tools contained within FHR Navigator support simultaneous database access by employees and HR personnel. The main tool within the application is the Federal Retirement Benefits (FRB) Web, which is a calculator that generates benefits information.</p>			

Section 1.0 Characterization of the Information

The following questions define the scope of the information requested and/or collected as well as reasons for its collection as part of the program, System, or technology being developed. The questions address all information collected, with more emphasis provided on the collection of PII, such as name, address, social security number, date of birth, financial information, etc.

#	Question	Response
1.1	What information is being collected, used, disseminated, or maintained in the System?	Name, date of birth (DOB), social security number (SSN), email, military status, employment status, salary, life insurance status, health insurance status, tsp, status, retirement plan.
1.2	What or who are the sources of the information in the System?	Department of Interior-Federal Personnel/Payroll System and Electronic Employee Personnel Folder.
1.3	For what purpose is the information being collected, used, disseminated, or maintained?	To provide employees with a tool for determining retirement estimates to best plan for their financial future.
1.4	How is the information provided to FHFA?	FHFA employees will manually enter data. In addition, there is an automated data feed from the Interior Business Center (IBC) payroll system that comes in on a bi-weekly basis.
1.5	Given the amount and type of information collected, what are the risks to an individual's privacy that are associated with collection of the data? Explain in detail how the loss, or compromise of the information will/can affect an individual's privacy.	The system will contain sensitive personally identifiable information (PII), including SSNs and DOBs. If the system security is compromised, FHFA employees could be at risk for identity theft and/or financial harm.
1.6	Are Social Security numbers are being collected or used in the system?	Yes

#	Question	Response
1.7	If SSNs are collected or used in the system, 1) describe in detail the business justification for collecting or using SSNs; 2) the consequences if SSNs are not collected or used, and 3) how the SSNs will be protected while in use, in transit and in storage.	The system requires SSNs when entering employees' data into FHR Navigator. SSNs are currently the most reliable means to identify an individual within this system. Accordingly, there is no option available to avoid use of SSNs, and their collection by this system is involuntary. FHFA's Procedures for Determining Whether Any New Collection or Use of Social Security Numbers Is Necessary requires that the collection and retention of SSNs be limited to the minimum extent necessary to accomplish a business function and that only those employees who require access to SSNs to discharge their job responsibilities have access to such information. The business use described herein meets this standard.

Section 2.0 Uses of the Information

The following questions delineate the use of information and the accuracy of the data being used.

#	Question	Response
2.1	How will the information be used and for what purpose?	The system is a tool to help employees with financial/retirement planning and will calculate retirement estimates based on specific employee data.
2.2	Describe any types of controls or safeguards in place to ensure that information is only used in the manner for which it was collected.	This system has limited functionality for calculating retirement estimates but includes audit capability to track who accessed the data.

Section 3.0 Retention

The following questions outline how long information will be retained after the initial collection.

#	Question	Response
3.1	How long is the information retained?	Employee's data will be retained and accessible for the GRS 2.2-040 retention period.
3.2	Has a retention schedule been approved by FHFA's Records Management Office and NARA? If yes, provide the corresponding GRS or FHFA specific Records Schedule number.	Yes. GRS 2.2-040: Destroy when survivor or retirement claims are adjudicated or when records are 129 years old, whichever is sooner, but longer retention is authorized if required for business use. (The 129-year retention period comes from 5 U.S.C. 8466.)

#	Question	Response
3.3	Discuss the risks associated with the length of time data is retained and how those risks are mitigated.	The risk to an individual's privacy if the data is lost or compromised is identity theft, extortion, embarrassment, and/or misuse of the individual's personal information. To address these risks, access to information in FHR Navigator is limited to those with an official business need-to-know.

Section 4.0 Notice, Access, Redress and Correction

The following questions are directed at notice to the individual, the individual's right to consent to uses of the information, the individual's right to decline to provide information, and an individual's ability to ensure the accuracy of the information collected about them.

#	Question	Response
4.1	Has a System of Record Notice (SORN) been created? If so, provide the SORN name and number. If one has not, and one is required, provide the name of the SORN and the expected publication date in the Federal Register.	OPM/GOVT-1
4.2	Was notice provided to the individual prior to collection of information? If so, what type of notice was provided?	Because this system collects employee information from the Department of Interior-Federal Personnel/Payroll System and Electronic Employee Personnel Folder, as noted in response to Question 1.2 above, and not directly from employees, no notice is provided to employees for this collection.
4.3	Do individuals have the opportunity and/or right to decline to provide information? What are the consequences if an individual declines to provide the information?	This information system does not obtain information directly from employees, as noted in the response to Question 1.2 and, as a result, employees do not have the opportunity to decline to provide that information.
4.4	What are the procedures that allow individuals to gain access to their information?	Employees do not have access to the system. Only approved HR personnel have access to this system. Individuals can direct requests for access to the Privacy Office in accordance with information provided in applicable SORN, OPM/GOVT-1 and FHFA's Privacy Act Regulation at 12 CFR 1204.
4.5	What are the procedures for correcting inaccurate or erroneous information?	Corrections will be made manually by OHRM staff to FHR Navigator. Individuals can direct requests to contest or appeal an adverse decision for a record to the Privacy Act Appeals Officer in accordance with the applicable SORN,

#	Question	Response
		OPM/GOVT-1 and FHFA's Privacy Act Regulation, 12 CFR 1204.

Section 5.0 Sharing and Disclosure

The following questions define the content, scope, and authority for information sharing.

#	Question	Response
5.1	With which internal organization(s) is the information shared? What information is shared and for what purpose?	FHR Navigator data is shared with OHRM staff (HR Specialists) and the employee that is the subject of the data. The data is shared for the purpose of helping employees with financial/retirement planning and will be used to calculate retirement estimates based on each employee's specific data.
5.2	With which external organization(s) is the information shared? What information is shared, and for what purpose? External organization(s) include Federal, state, and local government, and the private sector.	Except for any external sharing pursuant to the routine uses identified in the applicable SORN, OPM/GOVT-1, data from this system is only shared with EconSys, Inc., the FHR Navigator Vendor and operator of this system.
5.3	Is the sharing of PII outside the agency compatible with the original information collection? If so, is it covered by an appropriate routine use in a SORN? Describe such use. If not, describe the legal authority that permits PII to be shared outside of FHFA.	Yes, OPM/GOVT-1 allows for disclosure of information to external persons, agencies, or entities pursuant to the numerous routine uses described in that SORN, which include but are not limited to the following: (1) To the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order when the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (2) A congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual; and (3) To another Federal agency, to a court, or a party in litigation before a court in

#	Question	Response
		an administrative proceeding being conducted by a Federal agency, when the Government is a party to the judicial or administrative proceeding.
5.4	Given the external sharing, explain the privacy risks to the individual and describe how those risks are mitigated.	There are risks associated with the external vendor maintaining data. The Office of Technology and Information Management (OTIM) last completed a Security Certification and Accreditation (C&A) of the vendor in August 2022 to identify and mitigate such risks. Access to the records is restricted to those who require the records in the performance of official duties related to the purposes for which the system is maintained.

Section 6.0 Technical Access and Security

The following questions describe technical safeguards and security measures.

#	Question	Response
6.1	What procedures are in place to determine which users may access the System? Are these procedures documented in writing? <u>If so, attach a copy to this PIA.</u>	Application users are comprised of FHFA HR specialists and assistants. Accounts with HR roles are controlled by the agency and created by the FHFA systems administrator. Account management procedures are documented in FHFA's Customer Controls for FHR Navigator. In addition, the FHFA's Use and Protection of Personally Identifiable Information Policy restricts access to only those who need the PII to perform their official duties.
6.2	Will non-FHFA personnel (e.g. contractor personnel, regulated entity personnel) have access to the System and information contained therein? If yes, how will they gain access to the System? How will the agency control their access and use of information? Are there procedures documented in writing? <u>If so, attach a copy to this PIA.</u>	Vendor personnel from EconSys have access to the system in order to troubleshoot issues and provide technical support. Vendor accounts are assigned to the "FHFA – Client" group. The vendor will notify the System Owner whenever a new support account is being created in the system. Account management procedures are documented in FHFA's Customer Controls for FHR Navigator.

#	Question	Response
6.3	Describe the type and frequency of training that is provided to users either generally or specifically that is relevant to the program or System?	All FHFA employees are required to undergo security, privacy, and Records and Information Management (RIM) training for use of FHFA systems at onboarding and annually thereafter. In addition, all FHFA users with elevated privileges receive specialized security training, and role-based privacy awareness training is required for those individuals whose work duties and responsibilities involve the collection, use, storage, access, or maintenance of PII.
6.4	Describe the technical/administrative safeguards in place to protect the data?	FHR Navigator is authorized under the Federal Risk and Authorization Management Program (FedRAMP). Further, FHFA has developed Customer Controls that describe the Agency's implementation of controls designated as the responsibility of the customer agency within the FHR Navigator FedRAMP package. This includes procedures for securely managing access to the system, reviewing audit logs, etc.
6.5	What auditing measures are in place to protect the data? Who reviews these measures and how frequently are they reviewed?	FHR Navigator captures logs of all user actions on the system, and on a monthly basis the system owner will generate audit log reports of user activity, review the logs, and notify IT Security when the logs have been reviewed, noting if any unusual activity was observed.
6.6	Has a SA&A been completed for the System or Systems supporting the program? If so, provide the date the last SA&A was completed. If not, and one is required, provided the expected completion date of the SA&A.	FHR Navigator received its initial FedRAMP Authorization on May 1, 2014. It is in the continuous monitoring phase of the FedRAMP program and FHFA reviews the status of ongoing assessments at least annually.
6.7	Has an Authority to Operate (ATO) been issued for this System? If so, what date was it issued, and for how long was it issued? If not, when do you anticipate such ATO being issued?	FHFA has issued an agency authorization for FHR Navigator. The most recent authorization was signed on September 29, 2022.
