FHFA House Price Index Up 0.2 Percent in July

Washington, DC – U.S. house prices rose 0.2 percent on a seasonally adjusted basis from June to July, according to the Federal Housing Finance Agency's monthly House Price Index. The previously reported 0.7 percent increase in June was revised downward to a 0.6 percent increase. For the 12 months ending in July, U.S. prices rose **3.7** percent. The U.S. index is **16.4** percent below its April 2007 peak and is roughly the same as the June 2004 index level.

FHFA uses the purchase price of houses with mortgages owned or guaranteed by Fannie Mae or Freddie Mac to calculate the monthly index. For the nine census divisions, seasonally adjusted monthly price changes from June to July ranged from -0.8 percent in the East South Central division to +1.3 percent in the Mountain division while the 12-month changes ranged from -1.4 percent in the Middle Atlantic division to +11.9 percent in the Mountain division.

Monthly index values and appreciation rate estimates for recent periods are provided in the table and graphs on the following pages. For complete historical data, visit the [HPI Datasets webpage](#).

For detailed information concerning the monthly HPI, please see the [HPI Frequently Asked Questions \(FAQ\)](#). The next HPI release will be on Oct. 24, 2012 and will include monthly data for August. Release dates for the remainder of 2012 and all of 2013 are available [here](#).

###

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac and the 12 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$5.7 trillion in funding for the U.S. mortgage markets and financial institutions.
