*Re: Final Determination of 2022 Housing Goals Performance*

Dear Mr. Ericson:

The Federal Housing Finance Agency's (FHFA) Federal Home Loan Bank (FHLBank) housing goals regulation establishes annual requirements for FHLBank Acquired Member Assets (AMA) activity. These requirements include both a mortgage purchase housing goal and a community-based AMA user housing goal. FHFA has determined that for 2022, the FHLBank of Chicago met both the mortgage purchase housing goal and the community-based AMA user housing goal.

For the mortgage purchase goal, at least 20 percent of an FHLBank's AMA mortgage purchases must be for low-income families, very low-income families, or families in low-income areas. 12 CFR 1281.11(a). For the community-based AMA user goal, at least 50 percent of an FHLBank's AMA users – as that term is defined at 12 CFR 1281.1 – must be community-based AMA users. 12 CFR 1281.11(b). A community-based AMA user is an AMA user whose average total assets over the three-year period culminating in the year preceding the one being measured are no greater than the applicable community-based AMA user asset cap. 12 CFR 1281.1 (definition of "community-based AMA user"). This cap for 2022 was \$1.323 billion.

FHFA has determined that the FHLBank of Chicago's 2022 performance under the mortgage purchase housing goal was 43.5 percent, and 2022 performance under the community-based AMA user housing goal was 84.4 percent.

Please see the table on the following page for details.

Any purchases of mortgages for families with incomes above 80 percent of area median income in excess of the 25 percent cap shall be treated as mortgage purchases for purposes of the housing goals and shall be included in the denominator for the housing goal, but such mortgages shall not be included in the numerator in calculating a FHLBank’s performance under the housing goal.”)
