Senators request input on USDA rural housing programs

U.S. DEPARTMENT OF AGRICULTURE

WASHINGTON, DC 2022

Recap:

The President and Congress charged the United States Department of Agriculture (USDA) to be the lead agency to develop and submit the Federal Strategic Plan to provide Rural Development. Senators Tina Smith (D-MN) and Mike Rounds (R-SD), Chair and **Ranking** Member of the Senate subcommittee with jurisdiction over housing programs, are asking for **stakeholders'** input on USDA Rural Housing Service programs. Comments can be emailed to rural_housing@smith.senate.gov by **July 8**. The Federal Strategic Plan to provide Rural Development will serve as a roadmap for joint action by Council agencies to guide the development of programs and budget proposals towards a set of measurable targets based in the Rural Development plan. The Federal Strategic Plan to provide Rural Development will reflect interagency agreement on a set of priorities and strategies the agencies will pursue over a five-year to eight-year period.

We look forward to your input and thank you again for your participation:

TW's Ministry recommendations:

TW's Ministry is honored to participate in the recommendation strategies to **develop Rural America Infrastructure** {Proverbs 29:18} **and Rural America Citizens**; according to the Bible this vision should be **executed** to its fullest to provide happiness to Rural America citizens.

TW's Ministry, **All rights reserved** ©. [Page Publishing Inc](#)

TW's Ministry is honored and blessed to have been able to participate in stake holders {community engagement} recommendation strategies since the late 1990's for Federal agencies and/or US {House or Senate} Congress.

TW's Ministry is thankful the White House **invited** TW's Ministry to the Latino White House event in Chicago Illinois a couple of weeks ago. This allowed TW's Ministry to **engage** with Mia Mayberry {Deputy Director - USDA}, Shelby Scales {Director - Transportation}, Montas-Hunter Sonja {NSF} and Melody Gonzales {WHO-ED}.

TW's Ministry is also thankful all of them took time to **engage** with TW's Ministry on a one-on-one conversation before they were pulled and tugged by other participants wanting to engage in conversation as well.

Since TW's Ministry is engaged in both area's {Urban & Rural} of America living; our conversation included both. Therefore, here are TW's Ministry recommendations for the Federal Strategic Plan to provide Rural Development by U.S. Dept of Agriculture.

TW's Ministry recommendations consist of **Five Pillars**:

- Core building blocks
- Commuter building blocks
- Comprehension building blocks
- Community building blocks
- Congressional {Federal, State, County and Local} Human Life Cycle building blocks

1st Pillar – Core building blocks:

The **delivery** of the Federal Strategic Plan for Rural Development by U.S. Dept of **Agriculture** is the **Core** to build, bless and benefit Rural America.

- 1) Telecommunication Programs
- 2) Electric Programs
- 3) Community Facilities Programs
- 4) Water and Environmental Programs
- 5) Business and Cooperative Programs
- 6) Single Family Housing Programs
- 7) Multi Family Housing Programs
- 8) Veteran Housing {Single & Multi}Programs – addendum **recommendation**: this is **severely** needed {facilities were built on VA Hines IL property and has been a blessing}
- 9) Veteran Hospital and/or voucher system with Rural Hospitals - addendum **recommendation**: this is **severely** needed {before Uber service took over; my biological father cab team transported Veteran's from VA Hines IL to rural areas due to many veteran's needing a ride from VA Hines IL because there is NO VA Hospital in Rural America and most times, Veterans can have family/friends drop off at VA Hines IL but required a cab back from 1960's to Present Day}
- 10) Distance Learning Programs
- 11) Telemedicine Grants

For the **Core building blocks** to become a success; targeted areas must be used as the model to develop the best practice implementation for all Rural America in the United States.

My 1st recommendation is for the State of Mississippi starting at US 15 in Starkville MS going straight down US 15 to the intersection of US 15 & US 20 {Decatur MS & Newton MS} – 40 mile radius of implementing **Core building blocks**

My 2nd recommendation is for the State of Illinois starting at US 34 in Yorkville IL going straight down US 34 to the intersection of US 34 & US 39 {Meredith IL} – 40 mile radius of implementing **Core building blocks**

Basically, every State will have a targeted area the implementation of **Core building blocks**.

Where the following agencies will need to participate as well.

- The Department of Education
- The Department of Justice
- The Department of Health & Human Services
- The Department of Hud
- The Department of Veterans
- The Department of Home Land – FEMA
- The Department of Small Business
- The Department of EPA
- The Department of Transportation

2nd Pillar – Commuter building blocks:

The Federal Strategic Plan for **Transportation** is the **Commuter** building block that will **drive** The Federal Strategic Plan for Rural Development by U.S. Dept of Agriculture to build, bless and benefit Rural America in roads **and** streets infrastructure.

TW's Ministry has been blessed to drive, watch, witness, and walk on three {3} major Rural America roads and streets infrastructure **expansion** from Year 2000 to Year 2015:

US 34/ US 30 {Oswego IL} to Rt 59 {Naperville IL}
 US 34 {Plano IL} to US 34 {Oswego IL}
 Rt 47 {Yorkville IL}/US {Yorkville} to I-80 {Morris IL}

The blessing, benefit and bounces was to see students **and** students' athletes using their bikes to get to practice and other areas through Rural America towns, which equal Healthy exercise as well.

The blessing, benefit and bounces was to see **adults** using their bikes to ride through Rural America towns, which equal Healthy exercise as well.

The blessing, benefit and bounces was to see **citizens** walking through Rural America towns, which equal Healthy exercise as well.

The blessing, benefit and bounces was to see **citizens** purchasing homes {single & multi} due to famers selling land to developers due to improve infrastructure access.

For the **Commuter building blocks** to become a success; targeted areas must be used as the model to develop the best practice implementation for all of Rural America in the United States.

My 1st recommendation is to continue infrastructure {US roads & US routes} **expansion** & add infrastructure **Back Roads** expansion – 40 mile radius of implementing **Commuter building blocks**

My 2nd recommendation is to develop Public Transportation vehicles {Bus System & Train System} infrastructure {US roads & US routes} – 40 mile radius of implementing **Commuter building blocks**

For example:

US 34 runs from Naperville IL through Sandwich IL, where the Bus routes stops in Oswego IL

Students, Students Athletes and/or citizens who can qualify **or** obtain a job in Oswego IL and/or or Naperville IL off US 34 does not have access to Public Transportation.

Rural America needs Public Transportation vehicles {Bus System & Train System} partaking on US roads & US routes.

3rd Pillar – Comprehension building blocks:

The Federal Strategic Plan for **National Science Foundation** is the **Comprehension** building block that will **direct** The Federal Strategic Plan for Rural Development by U.S. Dept of Agriculture to build, bless and benefit Rural America in true roots of education **and** academic learning.

NSF Federal Strategic Plan:

[Leading the World in Discovery; and Innovation; STEM Talent Development; Delivery of Benefits from Research - NSF Strategic Plan for Fiscal Years \(FY\) 2022 - 2026 | NSF - National Science Foundation](#)

Since Rural America really do not have park districts and primary relies on YMCA's and School District programs for the Summer {May - August} Months.

My 1st recommendation is for NSF to partner with YMCA's and/or School Districts to sponsor a **FREE** 2 hour NSF class session and/or Out door field trips related to Science and STEM during the Summer {May - August} Months.

- Age group: 1st grade to 3rd grade
- Age group: 4th grade to 6th grade
- Age group: 7th grade to 8th grade
- Age group: 9th grade to 10th grade
- Age group: 11th grade to 12th grads

My 2nd recommendation is for NSF to develop, design and deploy it's own Virtual Technology Inter-Active Mobile Bus to engage Students & Citizens by touring through Rural America during the Summer {May - August} Months.

Process:

TW's Ministry, **All rights reserved** ©. [Page Publishing Inc](#)

My 2nd recommendation is for NSF to develop, design and deploy it's own Virtual Technology Inter-Active Mobile Bus to engage Students & Citizens by touring through Rural America during the Summer {May - August} Months.

Process:

- Since Federal Agencies are divided into regions. Twelve {12} or Elven {11} Greyhound Charter buses will need to be turned into Virtual Technology Inter-Active Mobile Bus to engage Students & Citizens by touring through Rural America during the Summer {May - August} Months.
- Each Region will have their own Virtual Technology Inter-Active Mobile Bus to engage Students & Citizens by touring through Rural America during the Summer {May - August} Months.

4th Pillar – Community building blocks:

The Federal Strategic Plan for U.S. Dept of Education is the Community building block that will deploy The Federal Strategic Plan for Rural Development by U.S. Dept of Agriculture to build, bless and benefit Rural America in career readiness for students, student athletes and citizens.

My 1st recommendation is for Education to develop a special career readiness curriculum for all Rural America School Districts.

- Career Readiness Program – Being a Farmer & Understanding Farming Equipment.

Why: Many of the African Americans who move to rural America because of a HUD program {single or multi} homes; usually have basic learning skills. Where learning about Farming and Farming equipment can lead to a career success based on their level of learning.

- Career Readiness Program – Moving From Working on the Farm to a Skill Labor Career

Why: Many of the farmland students and/or adults; primarily understands and knows working on a farm; where they need to be introduced to a skill labor career which can lead to career success

My 2nd recommendation is for Education to continue partnering with Rural America Community Colleges for Career Readiness classes but needs to locate another avenue and/or meeting place in rural areas to really train & educate rural citizens on career readiness.

My 3rd recommendation is for Education to develop, design and deploy it's own career readiness curriculum for Rural America **only**; based on the **Core** of the Federal Strategic Plan for Rural Development by U.S. Dept of Agriculture:

- 1) Telecommunication Technician
- 2) Electrician – Housing Development
- 3) Carpentry - Housing Development
- 4) Water and Environmental Technician – Housing Development
- 5) IT Support
- 6) Business Management
- 7) Logistic Router and/or Transportation Router
- 8) Solar Technician – Housing Development

5th Pillar – Congressional {Federal, State, County and Local} **building blocks**:

Since all congressional leaders receive district and/or area funding to assist the citizens, constituents and community residents they represent in their hometown. TW's Ministry recommendation **is** the following:

- **Communication** Event {Four Times a Year based on the quarter system} – **All** Mayors and/or Village Board Presidents meets with their US House Rep & US Senate Rep to be informed of programs to assist them in Rural America as mayors and/or village board presidents
- **Connection** Event {Four Times a Year based on the quarter system} – **All** Citizens meets with their US House Rep & US Senate Rep to be informed of constituent's services and constituent's programs to assist their living as citizens in rural America
- **Community** Awareness Event {Four Times a Year based on the quarter system} – providing information and resources needed to take students and student athletes from High School to College to have the opportunity to explore life outside Rural America.

TW's Ministry is honored to participate in the recommendation strategies to **develop Rural America Infrastructure** {Proverbs 29:18} **and Rural America Citizens** according to the Bible this vision must be **executed** to its fullest to provide happiness.

TW's Ministry is honored to participate in the recommendation strategies to **develop Rural America Infrastructure** {Proverbs 29:18} and **Rural America Citizens** according to the Bible this vision must be **executed** to its fullest to provide happiness.

Recap:

The President and Congress charged the United States Department of Agriculture (USDA) to be the lead agency to develop and submit the Federal Strategic Plan to provide Rural Development.
