Subject: Thanks just hurt our country more

Why can't you just be responsible and lower the loan limit on housing. You are creating a dangerous situation for our country and economy by not doing so. It is utterly irresponsible and I hope when they have government hearings your are held accountable. Prices are going down and have gone down ALOT already. Not by 10K or so but by 100K and more all over California the Realtors fudge the numbers we all know that, so when you see the numbers yourself you see just how much they have fallen. And you think with all the foreclosures coming you are HELPING???? Prices will be down massively in a couple years when you finally do lower it, but by then Fannie & Freddie will have bought tons more loans for more then they should have and they will be defaulting rapidly and who foots the bill the TAXPAYERS. Use your brain and do the right thing, someone in our government PLEASE for gods sake.
