Re: Notice of Proposed Rulemaking and Request for Comments –
Members of Federal Home Loan Banks (RIN 2590-AA39)

Mr. Pollard:

As an affordable housing partner that works closely with community lenders and FHLBank Pittsburgh, we have observed firsthand the important role that the FHLBank plays in providing funding for community banks. The proposed rule will profoundly change the relationship between FHLBanks and their member banks that is so important to the affordable housing community in their local markets.

This rule will make membership in the FHLBank less attractive to banks and credit unions since continued access to FHLBank funding will be contingent on new ongoing asset tests. This will no doubt result in decreased lending by the FHLBanks which will hurt earnings. As you know, 10% of the net earnings of each FHLBank funds its Affordable Housing Program (AHP). Since 1990, FHLBank Pittsburgh has provided approximately \$183 million in AHP grant awards that have created more than 28,000 units of housing for low or very low-income residents. If current and prospective membership in an FHLBank is threatened, FHLBank Pittsburgh's ability to provide AHP grants to affordable housing partners will be diminished. In short, FHLBank Pittsburgh will have fewer funds available to provide AHP grants to support very-low and low-income housing. The recent HMDA data for 2013 shows the share of home mortgage loans to borrowers with incomes at or below 80% of area median income (borrowers served by FHLBank's AHP program) fell to only 26% of the total mortgage loans made in 2013. Consequently, a reduction in funding for housing for low-income borrowers at this time of fragile housing and mortgage markets is particularly damaging. The partnership that results between banks, affordable housing groups and FHLBanks for a successful AHP program saves at-risk families, veterans, senior citizens and people with disabilities from falling through the cracks. Working together, we keep people off the streets and help stabilize lives and communities.

In 2013 and 2014, Central Delaware Habitat for Humanity was awarded \$300,000 and \$400,000 respectively through the AHP. This was the first time Central Delaware Habitat was awarded funding from this program and it has been instrumental in allowing us to continue our work here in Kent County, Delaware. With FHLBank's partnership, we will be able to provide affordable housing for fourteen (14) very-low and low income homeowners. Our program targets those unable to obtain a conventional mortgage, so these homeowners are able to achieve the American dream of homeownership because of our program. Not only are they able to enjoy

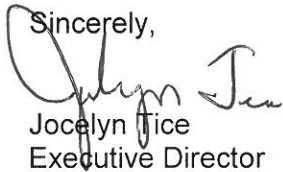

the financial equity in their home, but they contributed their own sweat equity throughout the entire process by working every Saturday side by side with our volunteers. Each homeowner also took financial literacy classes to learn how to adjust their budget to the new expenses of homeownership.

If there is a decrease in the membership rate to FHLBank, there will be a decrease funding available to non-profits which will result in a decrease in the number of housing units which will increase the number of people living in substandard housing.

We may not be FHLBank stockholders, but we are stakeholders. The neighborhoods we serve require access to credit to build new housing, rehab existing stock and stimulate community investment. An arbitrary asset test for continued FHLBank membership will achieve the opposite effect. Our relationship with vulnerable populations with urgent needs for safe and affordable housing leads us to conclude that restricting the continued access of banks and credit unions to FHLBank membership will hurt communities.

Central Delaware Habitat for Humanity strongly urges FHFA to withdraw RIN 2590-AA39.

Sincerely,
