Comment: Hello, I would like to voice my firm support for the PACE program. I believe this program will be a great economic engine for our economy. As long as the provision for immediate net positive cash flow is included, along with some type of performance guarantee, I can't think of anyone who would oppose a reduction and the stabilization of homeowners utility bills. It is important to stress this program is flexibly designed to enable the use of the most cost effective technologies for each individual residence, and that it is voluntary. I believe this program needs some more advertising, as most of the tradespeople I have talked to about this know nothing about it. Every one of them was very interested in the possibilities.

Thank you
