Subject: RIN 2590-AA53, Mortgage Assets Affected by PACE Programs

Good afternoon,

My name is Alex Bomstein, I live at 1008 Pine Street, Philadelphia PA 19107, and am reachable at (215) 981-4002 and this email address (klex123@yahoo.com).

I am writing to request that FHFA rescind its opposition to PACE programs, which are need to allow communities to pursue sustainable energy use and generation. As a city dweller and aspiring home owner, I am (and my neighbors and everyone else are) directly affected by the pollution and global warming caused by fossil fuel energy generation such as that that takes place not far from my house. PACE programs mitigate that harm by allowing our households to become more self-sufficient. This is good for those living in those homes and good for society as a whole.

Please consider this opinion when making your decision.

Best regards,
Alex
