Subject: RIN 2590-AA53 - Restore PACE programs now

Mar 16, 2012

General Alfred Pollard

Dear General Pollard,

[Please withhold my email and home addresses from the public record.]

It would be absolutely foolish not to extend this program! It doesn't require drilling in sensitive and/or dangerous areas, it doesn't require forcing chemicals into the ground and groundwater to force fossil fuels into a recovery mode, it doesn't require using many of Earth's declining natural resources. It is the cleanest and easiest way to reduce our impacts on our planet!

I therefore urge the Federal Housing Finance Agency to restore Property Assessed Clean Energy (PACE) programs that help property owners like me make energy efficiency and renewable energy upgrades to our homes, businesses and factories.

PACE programs save homeowners and businesses money on energy bills, create much needed local jobs, reduce our dependence on coal and other fossil fuels, and cut pollution that harms our health and environment.

By enabling renewable energy and energy efficiency improvements that benefit homeowners and lower utility bills, PACE also reduces default risk and improves home values.

I urge you to withdraw the July 2010 directive that froze PACE programs and allow these programs to move forward. Hundreds of communities in the 27 states that have passed PACE-enabling legislation are counting on your agency to reinstate these programs at a time when we need them most.

Sincerely,

Ms. Donnie Shelton
