Subject: RIN 2590-AA53 - Restore PACE programs now

Mar 16, 2012

General Alfred Pollard

Dear General Pollard,

We desperately need a new direction in energy use, and the PACE program has provided one piece of that new direction. As a nation we are literally tearing our countryside apart with fracking. There is a better way. Conservation and renewable energy sources are the way.

My own family invested in solar panels several years ago, and because we are grid-tied we now supply energy to neighboring farms when the output of our photovoltaic system exceeds our own use. Installing this system provided business to both a local engineering firm and a local plumbing/electrical firm.

PACE is built on a policy that looks toward a clean and abundant energy future. Please restore PACE.

Sincerely,

Ms. Barb Flom
