Subject: Re: RIN 2590-AA53, Mortgage Assets Affected by PACE Programs

I support PACE programs to encourage long-term investments that support sustainable energy. It is unfair to oppose such tax assessments when other community benefits assessments are allowed. We need more tools to encourage distributed renewable energy that is clearly more efficient and less damaging than large facilities on undeveloped land. Please reconsider your opposition to PACE and do the right thing for future generations.

Thank you for your consideration.
