Honorable Alfred M. Pollard
General Counsel FHFA
Re: RIN 2590 - AA53

Mr. Pollard

I write in regards to the PACE Financing proposal and some of the benefits it can provide. As a General Contractor I personally realize first hand the benefits of multiple financing options for clientele in their decision making process when approaching large financial improvements to their homes. PACE would allow me to grow my business and create employment opportunities as I do offer energy upgrades as part of my company services.

Some of the many other benefits of PACE as you are aware include: voluntary opt-in which reduces tax payer burden through incentive reductions and offering creative community financing options, reduces initial up front costs to the consumer encouraging larger participation thereby creating jobs industry wide, adds value to homes and improves communities through consumptive energy reductions.

It is my hope that you approve RIN 2590 - AA53 that undoubtedly will benefit this great Nation.

Thank You
Sincerely; Jeff Riehl
