I am very much in favor of the "Private Transfer Fee Covenants".

I have discussed the real life and real effect on so many areas of our economy with professionals that have a real business experience vs a from Washington view only. Not an opinion based on in the field work experience.

Please pass this Covenant and let's move towards ways that will have a real positive impact on an area of our economy that employees so many and can move our nation's economy forward and stop using only government logic to make stabs @ repairs instead of real world, real life professionals to make real changes for long term changes, not Washington's short term fixes without any hopes of lasting and with destruction of our economy by their decisions and new policies.
